E A Fenwick
BTR Group Intellectual Property, Knights House,
2 The Parade, SUTTON COLDFIELD, West Midlands,
B72 1PH, United Kingdom

(54) Finger protective device

(57) A finger-protective device comprises at least two aligned articulately linked rigid members of substantially channel shape for bridging the back and both sides of at least part of a finger. The linkage preferably is a flexible hinge and adjacent side edge areas of consecutive members may overlap at least when the device is flexed to a gripping configuration. The device is suitable for use by sports batsmen and hockey players and may be employed as part of a glove or mitten.

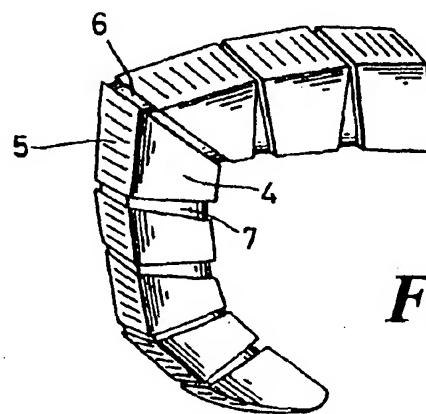

Fig. 2

At least one drawing originally filed was informal and the print reproduced here is taken from a later filed formal copy.

This print takes account of replacement documents submitted after the date of filing to enable the application to comply with the formal requirements of the Patents Rules 1995
